

Doing business without leaving **footprints**!

Velocity Print Solutions is all about creating lasting impressions on the mind... not the planet. Reducing our carbon footprint and preserving our environment will be a major theme for our ongoing business practices as we commit to reduce, reuse and recycle whenever and wherever possible. We further pledge to continue exploring new and innovative print technologies that make sure our business contributes to the making of a cleaner and greener world.

As we pursue our environmental goals, we promise to educate ourselves, our employees and our customers on how we can all make a difference every day. Our service standards now include the following environmental directives.

We will...

Conserve our natural resources by using environmentally responsible products.

Promote employee awareness of environmental concerns and responsibilities.

Implement effective programs to reduce, reuse and recycle.

Seek and obtain appropriate environmental certifications.

Partner with our customers to help them meet their environmental goals.

Explore new technologies for supplying power to our plants.
